Promoting Woodland Wildlife Stewardship

A Woodland Wildlife Management Program for Private Landowners

WI Coverts Project Workshops:
August 3-6, 2017
August 17-20, 2017
Woodruff, WI

Covert: A 14th century English word describing a dense thicket that provides shelter for wildlife.

Sponsored by:

- The Ruffed Grouse Society/ American Woodcock Society
- University of Wisconsin Extension
- UW-Madison, Department of Forest and Wildlife Ecology
- Wisc. Sustainable Forestry Initiative (SFI[®]) Implementation Committee
- Louisiana-Pacific Corporation
- The Anne and Jason Spaeth Family
- Braun Woodlands

The Coverts Workshop:

3 days of indoor sessions and outdoor experiences

for landowners who want to enhance their woodlands for wildlife

Using sound ecological principles, this 3-day workshop focuses on actions you can take to enhance your land's wildlife abundance and diversity.

- We'll get you on the land to show you how management can make a difference
- You'll learn how you can improve wildlife habitat and benefit financially from your land.
- We'll provide you with resources (e.g. websites, publications) to help you manage your woodlands.
- You'll find out who to contact for your woodland wildlife needs: private, state, and university forestry and wildlife specialists.

A Cooperative Program:

In exchange for the free, 3-day workshop and materials, participants agree to become COVERTS COOPERATORS, sharing what they have learned with their communities.

Cooperators agree to ...

- develop a sound wildlife management plan for their land.
- reach out and motivate other woodland owners in their community, and be available to answer questions.
- share resources provided by the Wisconsin Coverts Project.

You CAN
make a
difference
in your
land's
wildlife
abundance

and diversity

And it's
one of the
most
rewarding
time
investments
you can
make

Comments from Wisconsin landowners:

Since 1994, 669 landowners have become COVERTS COOPERATORS. Collectively they have influenced the management on over 875,000 acres of land.

"A great experience - I wish I had had the benefit 20 years ago."

"Thanks for a job well done! I was very pleased with the program. I didn't think there were so

many people who share my enjoyment in woodland management. Now I realize that we are a powerful group."

"This is an excellent outreach program. Private woodland

owners must be involved and this program can provide the means."

When is The Wisconsin Coverts Project Workshop?

Held annually over an extended weekend in August, from Thursday afternoon through noon on Sunday.

What does it cost?

Nothing, it's free. Lodging, meals, and materials are paid for by workshop sponsors.

Who can attend?

Any woodland owner or person responsible for managing a parcel of wooded land in Wisconsin or the Midwest region is eligible to apply. There is no minimum acreage requirement; we are most interested in persons with outreach potential/influence in their community.

We are looking for people who...

- can find time in their busy schedules for the workshop and some outreach activities in their communities.
- would like their woodlands to be healthy and productive.
- care about Wisconsin's woodlands and the wildlife that live within them.

Where is the Wisconsin Coverts Project Workshop held?

The program has been held at various locations in the past, but most recent workshops have been held at the University of Wisconsin's Kemp Natural Resources Station in Woodruff, WI.

Located in
Oneida County,
Kemp's 135 acres
support some of
the last oldgrowth forests

in the Lake states. The station provides opportunities for natural resources research, instruction and outreach amidst the lakes and forests of northern WI.

The boathouse serves as the indoor classroom with state-of-the-art equipment.

Attendees stay in a lodge overlooking Lake Tomahawk.
